COURSE PROJECTS

ThriftBuyer | github.com/LandGod/ThriftBuyer | ThriftBuyer.net

Developed a rating and review platform for B2C thrift store purchases to track product availability by enabling consumer reviews and recommendations.

- Built Node.js server running with Express and Handlebars to dynamically serve content.
- Created persistent data storage with MySQL and Sequelize, fully user searchable via category and geolocation.

Parent Trap | github.com/LandGod/Parent-Trap | evening-chamber-98293.herokuapp.com

Full stack project designed with React on Node Express server to create a family communication tool to track tasks and appointments for all members with text notifications and email reminders.

- Partnered with a team of three programmers utilizing principles of object-oriented programming (OOP).

Super Realistic Hacking Simulator | github.com/LandGod/Word-Guess-Game | landgod.github.io/Word-Guess-Game

Developed hang man game with comedic future-retro aesthetic in the style of a command line interface.

- Created with vanilla JavaScript, HTML and CSS.
- Utilized list of thousands of the most common English words and parsed using Python.

WORK EXPERIENCE

Full Stack Web Development Tutor	November 2019 – Present
---	--------------------------------

TRILOGY EDUCATION, Seattle, WA

Increased full stack web development skills and capabilities of working professionals as bootcamp students to learn and understand the material in software programming, coding and related technologies.

- Coached working professionals weekly on all aspects of web development resulting in successful completion.

Programmer, Light Board Master Electrician Technician	September 2018 – Present
--	---------------------------------

IATSE, Seattle, WA

Provided technical support for theater productions throughout Seattle area to ensure effective theatrical lighting.

- Programmed effects, moving heads, and conventional lights, on ETC Eos Ti and Ion computer consoles.

Technician Interim Lighting Supervisor	August 2016 – June 2018
---	--------------------------------

SOUTH COAST REPERTORY, Costa Mesa, CA

Designed and executed technical lighting for 16+ theatrical productions annually with tight deadlines in collaboration with all stage departments. Promoted to department head in 2018 and oversaw two direct reports.

- Oversaw successful maintenance and operation of lighting equipment throughout show runs.
